RE: Reappointment of Dr. Valery Khoze as Guest Investigator

Dear Maria,

I would like to request that the appointment of Dr. Valeri Khoze as Member of the Adjunct Faculty be continued as Guest Investigator in my Lab for a period of one year to 09/30/2017. This appointment carries no salary.

Dr. Khoze has been very active in the field of QCD and Diffraction, an area of physics in which our group is working on in the CMS experiment at the Large Hadron Collider (LHC). Continuing our collaboration with Valeri will be beneficial to to all.

I have informed Valer about the change of title (from Adjunct Faculty to Guest Investigator) and I am very happy that he accepts to continue our successful collaboration under the new title

Looking forward to the approval of this request,

With best regards,

Dino
