RE: Reappointment of Dr. Valery Khoze as Guest Investigator

Dear Maria,

I would like to request that the appointment of Dr. Valeri Khoze as Guest Investigator in my Lab continue for a period of one year to 09/30/2018. This appointment carries no salary.

Dr. Khoze has been very active in the field of QCD and Diffraction, an area of physics in which our group is working on in the CMS experiment at the Large Hadron Collider (LHC). Continuing our collaboration with Valeri will be beneficial to all.

Valeri is a theoretical physicist aiming at developing his studies to a level that useful to the design of experiments, leading to new discoveries. The continuation of his appointment will enable us to continue our very successful collaboration.

Looking forward to the approval of this request,

With best regards,

Dino
